

Educators! Check out the Niobrara Valley Wildlife Trunk

The Niobrara Valley Wildlife Trunk is now available! The trunk features animal tracks and skulls, bird feet and feathers, insect and owl pellet displays, information on pollinators, a tree identification kit, plant presses, and a score of books aimed at nature enthusiasts from pre-K to adult.

The popular "Bird Identi-flyer" uses the latest digital technology to provide instant access to high-quality images and realistic songs for 120 birds and 10 frogs. Another favorite, particularly among the younger set, is the collection of a dozen replicas of animal scat and a book to explain it all, "The Scoop on Poop." The Niobrara Trunk also includes a binder with activities and supplemental materials. The trunk is currently being administered by the Niobrara Council. To check it out, contact:
